Pupil Premium - What is Pupil Premium?

Pupil Premium was introduced by the Department for Education (DfE) in 2011, as additional funding for pupils who receive Free School Meals and who are Looked After Children. This is because the DfE have recognised that good education is the key to improving young people's life chances. This is particularly true for children from low-income families, or who are Looked After Children, research shows that without intervention these children are far less likely to leave schools with good GCSE results than other children. The Pupil Premium, using additional resources from outside the School's Budget, is intended to address the current inequalities by ensuring that funding reaches the pupils who need it most.

The Pupil Premium has also been introduced for children whose parents are currently serving in the armed forces. This service premium is designed to address the emotional and social well-being of these pupils.

The DfE have stated that schools have the right to spend this funding as they see fit based upon their knowledge of pupil needs. There is obvious accountability that serves to ensure that the money is used effectively and to the benefit of these key groups.

What does the data suggest for priorities for the next academic year?

EYFS

The GLD for EYFS decreased from 60% to 50%. However, maths was identified as an area that required improvement and as a result the EYFS lead has attended training on Maths mastery and is implementing new provision this year.

KS1

Despite COVID and home learning impact 73% of pupils passed phonics in Year 1. The focus for this cohort is to continue to raise attainment and accelerate progress next year, particularly in Phonics and writing.

KS2

Reading improved by 5% but is still well below national. We are now focusing on the secure assessment of phonics in LKS2 and the teaching of fluency in upper KS2. Maths increased by 1% and weekly book scrutinies by SLT are now focusing on the planned progression of units in order to ensure maths mastery. Writing fell slightly which was in part due to the large group of NTE and EAL children in the cohort who arrived in Year 3.

Behaviour and Attendance

Non PPG = 97%
PPG = 94.9%
Pupil premium attendance was 1.4% below the national target. Increased outreach to families by the SENCO and learning mentor and home visits aim to improve this further.
